CONSTRUCTION NOTIFICATION

Bullock Drive Watermain Replacement - Phase 1 (from McCowan Road to Jug Lane)

Dear Resident,

Please be advised that the Town of Markham will be proceeding with the reconstruction of the existing Town watermain along Bullock Drive from McCowan Road to Jug Lane. This Town project is part of the Waterworks Department's on-going Watermain Improvement Program to systematically replace and upgrade aged and deficient sections of watermain to improve supply capacity and reliability.

Construction is scheduled to begin on August 17, 2009. It is anticipated that the project will be completed by mid of November 2009, weather permitting. During construction, traffic on Bullock Drive will be restricted to one lane traffic and delays to be expected. All efforts will be made to maintain access to properties for vehicles and pedestrians. We expect that the disconnection/reconnection of water services may require temporary disruption of water supply and may cause some minor disturbances within your front boulevard.

The Contractor for this project is Direct Underground Inc. and the Consulting Engineer is Wardrop Engineering Inc. While there may be some inconvenience during the ongoing work, the Contractor, the Consultant and Town Staff will work together with you to try to keep the disruption to a minimum. All areas disturbed during construction will be restored to the original condition.

If you have any questions regarding the construction of this project, please contact the Town's Consultant Mr. Allan Arbuckle, P.Eng., at (905) 369-3058 or Site Inspector Mr. Jody Innes at (416) 587-9620. Should a problem arise after regular business hours or on the weekend, please call the Town of Markham's after hour's service at (905) 477-7000.

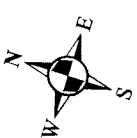

Sincerely,

Prathapan Kumar, P.Eng., PMP
Senior Project Engineer, Capital Right-of-Way
Asset Management Department
Tel: (905) 477-7000 ext. 2989
